SERVALL-STAZDRY

The New Type

SANITARY LITTER

For Poultry, Cattle, Horses and Pets

**Protects Baby Chicks Against
DAMPNESS and COCCIDIOSIS**

Servall-Stazdry safeguards against dampness in the brooder house and is an important aid in preventing and controlling coccidiosis. Its light color makes it easy to detect any irregularities in the color of the droppings.

In preparing the brooder house for baby chicks, the floor should be covered with the litter to a depth of not more than 1" to 1½". The depth will increase with use. Cloth bags or paper should be placed over the litter for the first few days. By daily stirring Servall-Stazdry with a fork, you hasten evaporation, helping to keep the litter dry which is one of the best safeguards against coccidiosis. Properly used, Servall-Stazdry will last from 4 to 12 weeks depending upon the number of chicks, weather, laxative effect of feed, heat and ventilation.

GERMACO HOTKAPS. "Individual hot-houses for every plant—are made of waxed paper in the form of a cone which completely covers the plant—the only way to fully protect them from frost. HOTKAPS also protect against rain, wind, ground-crusting and insects—your assurance of faster growing, hardier plants, with larger yields and greater profits, because you market earlier."

Prices and shipping weights are given below. **HOTKAPS** come in rolls of 1,000 for ordinary use, and in special trial or garden packages. For rapid placing, use the steel **HOTKAP** setter.

HYBRID SEED CORN

KENTUCKY GROWN

YELLOW HYBRIDS

U. S.-13 (WF9 X 38-11) X (Hy x L317)

The earliest hybrid recommended for Kentucky and most popular variety. Low, strong stalk, excellent root.

KY. 103 (WF9 X 38-11) (K4 x L317)

Somewhat taller and later than U. S. 13 but not so late or tall as Ky. 102. Very dependable under all conditions and rapidly becoming one of the most popular hybrids in the state.

WHITE HYBRID

KY. 203 (27 X 133) (33-16 x 49)

A new white hybrid, moderately early. Produces a good-sized ear. Adapted over wide area.
